MARANTZ DESIGN AND SERVICE

Using superior design and selected high grade components, MARANTZ company has created the ultimate in stereo sound.

Only original MARANTZ parts can insure that your MARANTZ product will continue to perform to the specifications for which it is famous.

Parts for your MARANTZ equipment are generally available to our National Marantz Subsidiary or Agent.

ORDERING PARTS:

Parts can be ordered either by mail or by telex. In both cases, correct part number has to be specified. The following information must be supplied to eliminate delays in processing your order:

1. Complete address
2. Complete part numbers and quantities required
3. Description of parts
4. Model number for which part is required
5. Way of shipment
6. Signature: any order form or telex must be signed otherwise such part order will be considered as null and void.

PARTS ORDERING

All of the above locations are fully equipped to take care of your total service needs. Because various countries have differing configuration requirements, it is necessary that you contact the service facility in your particular country. In the event that there is no service location listed for your country, please, contact the nearest facility for the necessary assistance.

In case of difficulties, do not hesitate to contact the Technical Department at abovementioned address.

TECHNICAL DATA

Disc diameter	: 80 mm/120 mm
Mains voltage /01	: 110 V, 127 V, 220 V \pm 10% (to be changed by carousel switch)
/02/05	: 110 V, 127 V, 220 V, 240 V, \pm 10% (to be changed by transformer connections)
/04	: 100 V \pm 10 %
/06	: 117 V \pm 10 %
Mains frequencies	: 50, 60 Hz (no adaptations required)
Power consumption	: 30 W
Frequency range	: 5 Hz + 20 kHz
Amplitude linearity	: max \pm 0,05 dB $\frac{1}{2}$ typical \pm 0,01 dB
Output voltage fixed	: 2 V rms \pm 2 dB $\frac{1}{2}$
Output impedance	: 200 Ω
Signal to noise ratio	: min. 95 dB typical 103 dB
Channel separation	: min. 93 dB $\frac{1}{2}$ typical 100 dB
Channel difference	: \pm 0,2 dB $\frac{1}{2}$
Total harmonic distortion	: min -90 dB $\frac{2}{3}$ typical -92 dB
De-emphasis	: 0 or 15/50 μ s (switched by the subcode on the disc)
Dimensions WxDxH	: 454x136x363 mm (tray closed)
Weight	: 15 kg
Variable line out	: motorized potentiometer controlled by remote control

$\frac{1}{2}$) into 100 k Ω // 100 pF

$\frac{2}{3}$) from 5 Hz + 20 kHz into 100 k Ω // 100 pF

OPERATION

44 749 A11

(GB) WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

(ESD)**(F) ATTENTION**

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement raccourcie par le fait qu'aucune précaution n'est prise à leur manipulation. Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enlever le bracelet sorti d'une résistance de sécurité. Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

(D) WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unvorsichtige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren. Verlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes. Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

(NL) WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.

Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

(I) AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD). La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cautela alla loro manipolazione. Durante la riparazione occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un bracciale sotto a resistenza. Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

SERVICE HINTS

In the set chip components have been applied.
For disassembly and assembly see figure below.

The disc should always rest properly on the turntable.
To achieve this a disc hold-down has been mounted in a bracket of the tray mechanism.
If the tray mechanism has to be disassembled for servicing, a separate service disc hold-down should be used.

A service disc hold-down can be composed in the following way

- Cut in the most inner ring of a disc hold-down (4822 462 50383) with small and sharp nippers, see fig. below.
- Enlarge the diameter of the innermost ring slightly with the hind part of a pencil or ballpoint, so that it jams onto the turntable with sufficient force.
- If the jamming force decreases after certain time of use, the diameter has to be enlarged with a pencil or ballpoint again.

TROUBLE SHOOTING

Working with the faultfinding tree

Follow the path of the faultfinding tree beginning at the top left. Perform the actions you come across in the various blocks. Look at the various side branches to find out if the information you see there applies to your problem. If, for instance, you find the indication display this means that no picture appears on the display.

If you establish this fault, follow the branch and perform the recommended actions. Check the signals mentioned. In a number of branches further reference is made to measurements you could carry out. These measurements are explained in several tables further on in this manual.

B-3 CHECK OF THE PHOTODIODES

Step	Signal	Mode					Remarks
1	D2 D1 D3 D4	power on		-	-		signal 4.567±38 Signal depends on Distance lens ↔ IR LED of remote control

T-22407A

B-4 CHECK OF LASER SUPPLY

The supply plus the monitor diode form a feedback system.

A defect in the lasersupply may result in the destruction of the laser. If, in that case, the laser is replaced, (= complete D.C.M.-unit) the new laser will also become defective. However, it is impossible to check and repair a feedback system if a link is missing. For this reason the laser supply can be checked with the replacement circuitiser assembly.

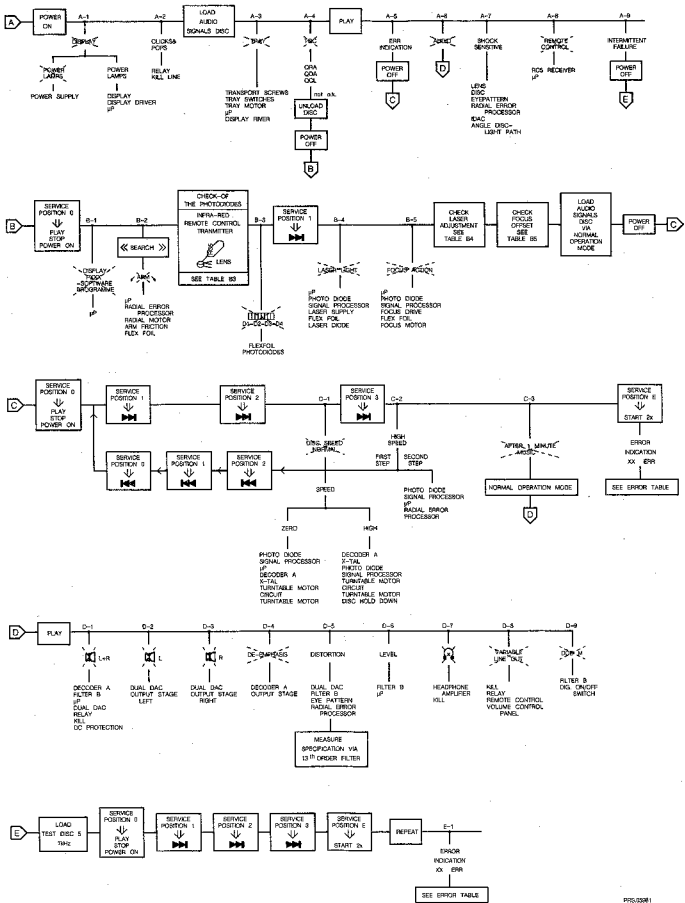

Step	Signal	Mode				Remarks
1	LO	serv. pos. 2		-	-	1.8V < 2.3
	LM	SK		-	-	170 < mV < 220
2	LO	serv. pos. 2		-	-	1.8V < 2.3
	LM	SK		-	-	170 < mV < 220
3	LO	Power on		-	-	0V ± 0.2V No light

T-22407B

B-4 LASER CURRENT ADJUSTMENT

Step	Signal	Mode				Remarks
1	-	Power off		R3120	1kΩ	- Pre-adjustment Ohmic value
2	Eye-pattern HF	Power on Test disc 5 play		-	-	Eye pattern
3	-	Test disc 5 play track 1		R3120	50 mV DC	- fine adjustment

PH50391
12/7/82

B-5

ADJUSTMENT OF FOCUS-OFFSET

Step	Signal	Mode					Remarks
1	-	Power on	-	R3169	-	-	adjust for optical mid-position of the focus motor
2	FE LAG	Play Test disc 5 Track 1	27	R3169	400mV \pm 40 mV DC	-	fine adjustment

T-224288

ERROR TABLE

Errors indicated in display when player is set in playmode in service position 3:

02 Err	Focus error	No track loss
03 Err	Radial start error	Minimum eccentricity point not found
06 Err	TL error during jump	No positive TL or RD edge during 60x8 ms
07 Err	Subcode error	No valid subcode within 3 sec.
08 Err	TOC error	Out of lead-in while reading TOC
09 Err	Eeprom cell error	Eeprom cell broken

REPLACEMENT CIRCUIT FOR LASER ASSEMBLY

THE LED EMITS ULTRAVIOLET LIGHT
LED GREEN e.g. C02HM S322 130 5012
PWS.0260
T2B/94

REPLACEMENT CIRCUIT FOR LASER ASSEMBLY

The feedback system sees it that the same amount of current flows through the LED. When SW is open and when SW is closed the LED emits little light.
PWS.0260
T2B/94

Checking the angle setting

The angle setting can be checked with the glass-disc method which is explained below.

Put glass disc 4822 395 90204 on the turntable. Make sure that the glass disc beds down well on the turntable.

Place the CD mechanism under a light source, under which there is a straight line (e.g. under a fluorescent tube with grid).

Set the arm to mid-position of its radial track.

Turn the mechanism until the arm is parallel to the line under the light source (see figure below).

Look into the direction and in the extension of the line to the reflection there of on the glass disc and in the objective.

Locate the CDM in such a way that the line reflected by the glass disc runs across the centre of the objective. The line reflected by the objective should fall just within the surface of the objective. If this is the case, the two lines are not more than 4 mm apart and squareness is correct.

Fig. 3

Fig. 6

Turn the CD mechanism through 90° relative to the previous position. The arm must be kept in mid-position (see figure above).

Repeat the previous check.

Adjusting the angle setting

For adjusting the angle setting one or both of the two locking knobs for the bearing plate on pos. 51 must be taken out.

If a check on the angle setting shows that the angle falls outside the tolerance, the angle should NOT be adjusted for minimum deviation, but it should be adjusted within the tolerance.

The new setting should lie between the old setting and the optimum setting. After adjusting the setting, the friction of the arm must be checked. This is done by means of a spring pressure gauge which is held against the magnet of the focusing unit.

The friction of the arm, measured over the entire meter reading, should not be greater than 25 mN.

When the friction appears to be too high, the RAFOC unit must be replaced and the angle between disc and light path adjusted.

The lock is adjusted as follows:

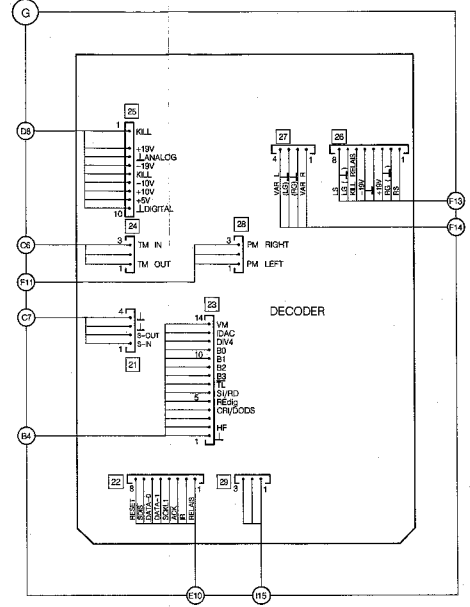

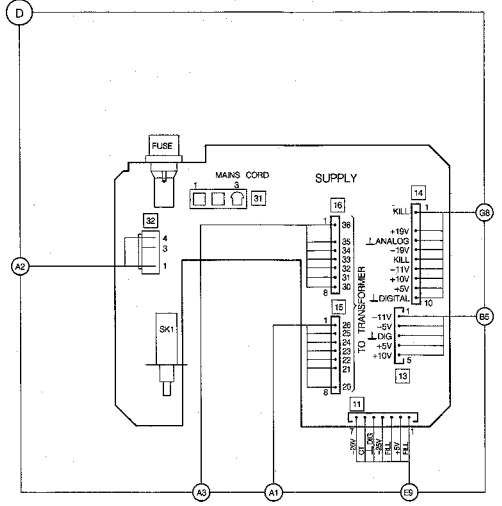

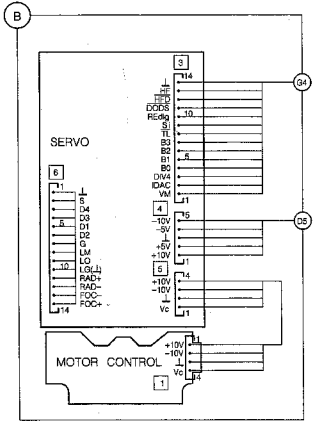

Fig. 7

Loosen screws C (see figure above) until bearing plate D can be displaced. Correct the angle setting by moving the bearing plate into the direction shown in figure below. Tighten screws C, ensuring that the setting does not drift. Then double check the setting in two directions.
